

LOCAL ABORIGINAL NETWORKS (LANs)

Strong culture Engaged People Confident Communities

23rd January, 2020

Dear East Gippsland Local Aboriginal Network Participants,

In response to the recent bushfires in our region that have effected many of our community members the Bairnsdale Local Aboriginal Network would like to create an opportunity and a space for community to come and check in with each other and if you feel comfortable to have a yarn and share your story of how you have been affected.

We also would like to list what your immediate needs are and services that you are in need of now to relieve some of the stresses you might be experiencing.

Your health & wellbeing is important and moving forward capturing and documenting your stories will be critical to making sure that our Aboriginal voices are heard on a local and state level. This will ensure your Individual needs are met and resources are distributed in the right areas that will help to strengthen our Communities again.

Looking forward to catching up with you

Yarrabee
